## PREFACE

This is the seventh issue of this publication, which assembles in consolidated form the statistics of the Australian Capital Territory available in this Bureau. The object of the Summary is to present as comprehensive a survey as possible without unduly increasing the size of the publication, a particular feature being a long-term table, wherever practicable, in each of the various statistical fields.

The contents of the previous issue have been advanced wherever possible, and new tables have been included relating to minimum rates of wage (the table on basic wages has been discontinued), trade unions, public finance, and diploma courses at the Canberra Technical College. In addition, the map and list of suburbs have been revised to include the eight new suburbs gazetted in May 1968.

**EXPLANATORY NOTES: WORK FORCE, CENSUS, 30 JUNE 1966**

At the 1961 and previous Censuses the work force was determined as:

‘Those who are engaged in an industry, business, profession, trade or service at the time of the Census (including those on long service leave, etc.) . . .’; and  
‘. . . those out of a job at time of the Census but who are usually engaged in an industry, business, profession, trade or service . . .’

At the 1966 Census an additional set of four questions was asked in order to obtain information on the basis of which the work force could be determined more precisely. The questions were as follows.

‘Did the person have a job or business of any kind last week (even though he may have been temporarily absent from it)? ANSWER “YES” OR “NO”.’

‘Did the person do any work at all last week for payment or profit? ANSWER “YES” OR “NO”. Persons working without pay as a helper in a “family business” or farm and members of the clergy and of religious orders (other than purely contemplative orders) should answer “YES” to this question. Persons doing only unpaid housework should answer “NO”.’

‘Was the person temporarily laid off by his employer without pay for the whole of last week? ANSWER “YES” OR “NO”.’

‘Did the person look for work last week? ANSWER “YES” OR “NO”. (NOTE: “Looking for work” means (i) being registered with Commonwealth Employment Service, or (ii) approaching prospective employers, or (iii) placing or answering advertisements, or (iv) writing letters of application, or (v) awaiting the result of recent applications).’

The work force includes all persons for whom the answer ‘yes’ was given to any one of these four questions, except that persons helping but not receiving wages or a salary who usually worked less than 15 hours a week were excluded from the work force.

This approach conforms closely to the recommendations of the Eighth International Conference of Labour Statisticians held in Geneva in 1954 and the information so obtained has been used in determining the work force for the purposes of the 1966 Census.

The effect of the new definition is to include additional persons in the work force. This applies particularly to those working part-time (sometimes for only a few hours a week) some of whom, in 1961, may not have considered themselves as ‘. . . engaged in an industry, business, profession, trade or service.’

(a) Represents 82 private houses in Canberra Metropolitan Area and 2 in Rural A.C.T. (b) Represents 7 self-contained flats in Canberra Metropolitan Area. (c) At the 1961 Census 'Share of self-contained flat' was not separately identified. In cases where more than one household group were occupying a self-contained flat they were counted as one household group occupying a self-contained flat.

#### NOTE

At the 1966 Census the following definitions were used as a basis for the Census of Dwellings.

(a) An 'occupied dwelling' is any habitation occupied by a Household group and may comprise the whole or only part of a building.

(b) A 'household group' is a person or group of persons living as a domestic unit with common eating arrangements.

The number of 'occupied dwellings' and the number of 'households' are therefore identical by definition.

The lack of a structural definition of a dwelling is not considered a significant disadvantage in Australia as the majority of households do in fact each occupy one distinct dwelling structure (i.e. a house or a self-contained flat).

(a) Includes persons employed in the Australian Capital Territory who reside in adjoining areas.

NOTE. The estimates shown above are based on comprehensive data derived for the purpose from the population censuses of June 1954 and June 1961 and the population count of Canberra-Queanbeyan, June 1963. The estimates are derived from pay-roll tax returns, returns of government employment, other direct records of employment and estimates of the number of employees not covered by these collections. They are not directly comparable with statistics derived from the 1966 population census, for which new work force definitions were adopted.

NOTE. In June 1967 the Commonwealth Conciliation and Arbitration Commission decided to eliminate basic wages and margins from its awards and to introduce total wages to operate from the beginning of the first pay period commencing on or after 1 July 1967. Consequently, the table of basic wages previously shown in this publication has been discontinued.

(a) The statistics shown are based on returns received from government authorities, contractors and owner-builders who undertake the erection of new buildings. Details obtained from government authorities and building contractors refer to all areas. Figures for houses exclude temporary dwellings, dwellings attached to other buildings, sheds, huts, etc. Each flat is counted as an individual living unit. Minor additions and alterations, renovations and repairs are excluded. Prior to 1 July 1966, additions of \$10,000 and over to existing buildings are included with new buildings. From 1 July 1966, alterations and/or additions of \$10,000 and over are included with new buildings. The values of new buildings exclude the value of land and represent the estimated value of buildings on completion. (b) The values shown represent the estimated value of work carried out on buildings during the period. For any building the sum of these values obtained during its construction equals the value of the building on completion. Not available prior to March quarter 1957.
